JAVA DEVELOPER

Job Description

Gold Mobile (Clark, NJ, www.gold-mobile.com), is a fast-moving developer of mobile messaging, multimedia, and industry application solutions for leading brands, companies, and content publishers. Our mobile products and services are primarily used to enhance marketing and customer service programs. We are seeking a highly motivated programmer to help develop applications for mobile phones.

Requirements include:

- 3-5 years experience developing JAVA web applications
- Expertise in JavaScript (other languages a plus)
- Knowledge of MySQL
- Knowledge of best practices in web design and principles of web usability
- Knowledge of Linux system administration a plus
- Experience with mobile development a plus
- Fast learner
- Ability to work in a dynamic, fast-paced environment under pressure
- Ability to develop applications from written specifications
- Team player

This is an opportunity to be a real player in a growth company with teammates who really “get it”.

Gold Mobile offers a creatively stimulating and professional work environment and a competitive compensation package. To apply, please send an e-mail with the position for which you are applying, resume, examples of applications you have developed, and salary requirements to jobs@gold-mobile.com.

Gold Mobile is an equal opportunity/affirmative action employer. M/F/D/V.
